

TCOM's 71M aerostat system is a versatile wide-area persistent surveillance solution. U.S. Military and allied forces rely on the 71M as an integral component of missile and air defense systems.

Strategic Class payloads may include long-range radar, active and passive communications equipment as well as COMINT/ELINT technologies, often carrying payloads as high as 15,000 ft above ground control station. Due to their large size, high altitude and considerable payload, Strategic Class aerostats use a stationary mooring station.

## 71M-SPECIFICATIONS

**Payload Weight** 2155 kg/ 4750 lbs

**Available Payload Power** 23.5 kVA

**Wind Speeds** 

Operational- 70 kts/ survival-90 kts

**Nominal Altitude** 4600 m/ 15000 ft

**Flight Duration** 30 days

**=** 410.312.2455
